SUMMARY

Product & UX Designer with 5+ years of experience designing complex digital products across enterprise software, B2B SaaS, fintech, sustainability, and industrial technology. Experience spans enterprise, scale-up, start-up, agency, and freelance environments, with a focus on turning complex business, technical and user requirements into clear, usable product experiences. Working across product discovery, user research, interaction and UI design, prototyping and design systems, and collaborating closely with product managers, engineers, domain experts and customers throughout the product development process.

PROFESSIONAL EXPERIENCE

UX Designer Consultant — Nederman — Industrial technology

Helsingborg, Sweden · Apr 2026 – Present

- Design embedded HMI interfaces and cloud applications for industrial air-filtration systems, translating complex machine, operational and technical requirements into clear interfaces for operators.
- Work with technical experts, product management and stakeholders to define requirements and prototype the next generation of control software for one of Nederman's core filtration products.
- Develop and evaluate concepts for ambient air-quality monitoring, using prototypes to clarify potential product directions and support investment decisions.
- Improve the emerging cloud platform and contribute to a shared design system spanning web applications and hardware-constrained touchscreen interfaces.

Senior Product Designer — Position Green — Sustainability SaaS

Malmö, Sweden · Apr 2024 – Jun 2025

- Led product design for the Supplier Assessment product, supporting customers with human-rights due diligence and evolving requirements, including CSDDD.
- Combined customer interviews and product analytics to map the end-to-end user journey, identify product gaps and establish a shared product vision and staged roadmap with product and domain specialists.
- Designed new capabilities, including multi-tier supplier assessments, post-assessment reporting and third-party company search, taking concepts from discovery and validation through detailed product design.
- Created an automated survey dashboard that achieved 65% adoption following launch, while giving customers clearer visibility of assessment results.
- Contributed to a decarbonisation scenario tool, working with product management and sustainability experts to translate SBTi-aligned commitments and customer needs into a usable product.

UX/UI Designer — Gigapay — Fintech & Payments

Stockholm, Sweden · Jan 2023 – Apr 2024

- Served as the product designer during Gigapay's expansion beyond Sweden, redesigning onboarding and payment experiences to support international customers and payments.
- Redesigned KYC onboarding in collaboration with legal and engineering, using product analytics, session recordings and support cases to simplify complex DAC7 compliance and data-collection requirements.
- Reduced support tickets by 30%, while international payment volume increased 4× following the redesigned international experience.
- Mapped and redesigned the B2B payment and invoicing journey, exposing workflow and terminology issues and defining an improved experience for enterprise customers; the work supported conversations that contributed to signing Klarna as a customer.
- Established Gigapay's first accessible design system and delivered the wider visual rebrand, including brand guidelines, iconography, website and marketing assets.

UX Designer — Snow Software — Enterprise ITSM

Stockholm, Sweden · May 2021 – Dec 2022

- Contributed to the migration of enterprise IT asset-management workflows from on-premises software to cloud-based self-service products within a 15-person UX organisation
- Redesigned specialist workflows for broader customer use, balancing advanced configuration with progressive disclosure to make complex functionality accessible to less specialised users.
- Helped create a self-service agent/package-building experience, replacing a process that had previously required customers to request tracking files through customer service.
- Improved design-system components for WCAG AA accessibility, including component behaviour and keyboard-navigation documentation.
- Supported longer-term product-vision work through storyboards, illustrations and high-concept prototypes used to communicate future experiences to stakeholders.

UI Designer Consultant — Leikir Web — Digital agency

Paris, France · Sep 2020 – Jan 2021

- Designed websites and web applications for agency clients, translating client requirements into interface concepts, prototypes and implementation-ready specifications.
- Worked directly with clients, front-end developers and art direction from initial requirements through visual design and delivery.
- Designed digital experiences, including the Supamonk studio website and a redesign of Leikir Web's internal Jobs in Motion job-board concept.

UX/UI Designer — BIEKos — MedTech start-up

Amsterdam, Nethernlands · May 2020 – Jul 2020

- Worked with the founding team to develop a digital chronic-pain reporting concept from an early Google Forms prototype into a functioning application tested with patients in a Spanish hospital.
- Designed the application's navigation and data-input experience around the requirements of chronic-pain reporting.
- Supported the early-stage product and communications work with visual content for the company's blog.

EDUCATION

UX/UI Design Bootcamp — Ironhack

Amsterdam, Netherlands · Oct 2019 – Apr 2020

Bachelor's Degree — International Trade — UPEC IUT Senart-Fontainebleau

Paris, France · Sep 2016 – Sep 2017

Pre bachelor years — ISEG - Business and finance school

Bordeaux, France · Sep 2013 – Sep 2016

Certification
